Mr. Urisberg:

The skyline of Washington, D.C. is dominated by the Capitol and the Washington Monument. The Capitol is the key to the street address system even though it is not located in the center of the city. The city is laid out in rectangular blocks, created by streets intersecting at right angles. Also, diagonal arteries fan out from various centers. The radial lines are generally named after one of the fifty states. Pennsylvania Avenue is the most famous of them, with the White House at number 1600.

It is with sadness we mourn Jackie K.'s death. From FDR to Nixon - all dead. How sad! All the great ones are gone. Please get a copy of Jackie Kennedy's will, if possible. (?)

She kept a diary of 50 years of notes. She

had several views on the assassination. Be very aware of all this! Soon a new archive: controversy!
